Art Unit: 1724

Claims 1 – 12 are rejected under 35 USC Sec. 112(2) for failing to particularly point out and distinctly claim the invention.

Claim 1 appears to require that the granulated activated charcoal is in pellet form.

Claim 2 implies that the charcoal can have one of the following non-pellet forms: a mat or mats, a fabric, a support matrix, or an adsorption media. Accordingly, the scope of claims 1 and 2 cannot be ascertained with a reasonable degree of precision.

Claim 1 lacks antecedent basis for the term "said substances" recited in claims 3, 5, and 6. It is unclear whether "said substances" in claim 3 refers to the fluid, the charcoal, the stream of water, the water, the nutrients, the microbes, the matrix, the contaminant, or to some other unspecified substance.

Per claim 3, it is unclear whether the "treatable aqueous fluid" is the "stream of water" recited in claim 1, or whether it is a separate and distinct fluid stream.

Per claim 5, which depends from claim 3, it is unclear whether "the fluid" is the "stream of water" recited in claim 1, the "treatable aqueous fluid" recited in claim 3, the "treated fluid" recited in claim 3, or some other separate and distinct previously unspecified fluid.

Art Unit: 1724

Per claim 6, which depends from claim 5, it is unclear whether "said fluid" is the "stream of water" recited in claim 1, the "treatable aqueous fluid" recited in claim 3, the "treated fluid" recited in claim 3, or some other separate and distinct previously unspecified fluid.

Per claim 7, which depends from claim 1, it is unclear whether "said fluid" is the "stream of water" recited in claim 1, or whether it is a separate and distinct fluid stream.

Claim 1, clause (d), appears to require that there is an upstream seeding zone from which microbes are supplied in fluid flow to the downstream treatment zone. Claim 10 requires "a seeding zone upstream of [the plurality of] treatment zones." It is unclear whether the seeding zone recited in claim 1 is the very same seeding zone recited in claim 10, or whether claim 10 requires at least two seeding zones.

Per claim 11, it is unclear whether both a "stream of water" (as recited in claim 1) and a separate "waste water containing toxic contaminants" (as recited in claim 11) is required, or whether it is sufficient for claim 11 purposes that the "stream of water" recited in claim 1 contain toxic contaminants and that the stream of water be passed through the matrix to reduce "said contaminants."

Per claim 11, it is unclear whether "reduce said contaminants" means "reduce the concentration of said contaminants," or whether it means that the oxidation state of the contaminants be reduced (as opposed to oxidized).

In claim 12, the expression, "gas transported toxic" cannot be understood. Was "passing gas-transported toxic compounds" intended?

In claim 12, the term, "said contamination" lacks antecedent basis in claim 1. That is, it is unclear to what "contamination" applicant refers.

Insofar as method claim 13 is not limited to a method using granulated activated charcoal in pellet form, it is not drawn to the elected invention. Henceforth, applicant must indicate provide an indication that claim 13 is "withdrawn," i.e.,

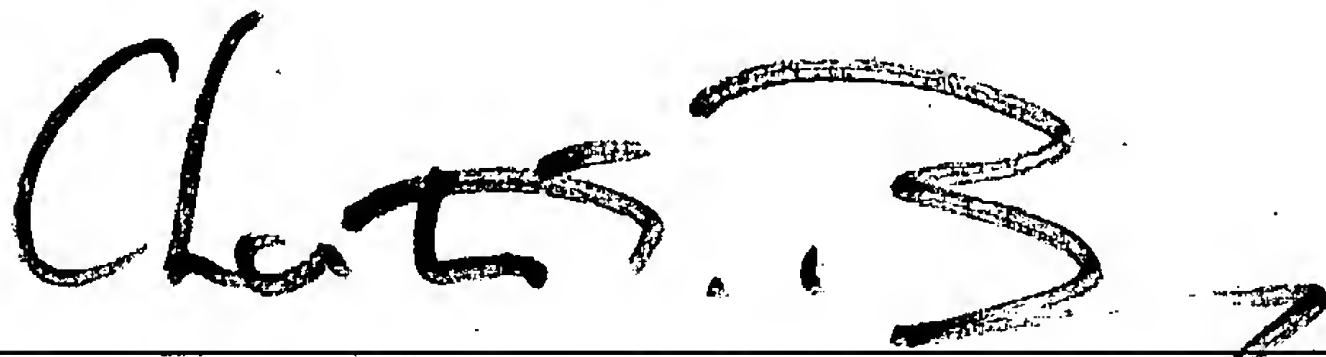

Claim 13 (withdrawn). The method of

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
